PROFESSIONAL SUMMARY

AI Engineer with 3+ years of experience building production GenAI applications, data pipelines, and business intelligence solutions. Specialized in LLM integration, RAG systems, and automating data workflows for B2B environments. Proven ability to bridge technical implementation with business outcomes, delivering solutions that improve efficiency, accuracy, and revenue. Strong background in Python, cloud infrastructure (AWS), and remote collaboration across distributed teams.

KEY PROJECTS

LLM-Powered Lead Intelligence System | *GPT-4, LangChain, Python, Pinecone, AWS Lambda*

- Built end-to-end RAG application using LangChain and GPT-4 to automate B2B lead qualification, improving accuracy by 35% across 50M+ records
- Designed prompt engineering workflows that reduced manual research time by 80%, enabling sales team to focus on high-value prospects
- Implemented vector database (Pinecone) for semantic search, reducing query response time from 3.2s to 180ms
- Deployed serverless architecture handling 10,000+ daily API calls with 99.9% uptime

Real-Time B2B Data Intelligence Pipeline | *Apache Kafka, Spark, Docker, Kubernetes, Python*

- Architected distributed streaming system processing 50M data points daily with sub-second latency using Kafka and Spark
- Optimized data processing workflows reducing pipeline runtime by 40% (6.5hrs → 3.9hrs) through Spark tuning and caching strategies
- Containerized services with Docker and Kubernetes, enabling auto-scaling to handle 3x traffic spikes during peak demand
- Implemented automated data quality checks improving accuracy from 78% to 94%

PROFESSIONAL EXPERIENCE

AI Engineer, Data Systems

BizProspex • Remote, India • August 2025 – Present

- Design and deploy generative AI applications using GPT-4, Claude, and open-source LLMs (Llama) integrated with CRM data, driving 25% increase in sales pipeline conversion
- Build MLOps pipelines with MLflow and AWS SageMaker including automated versioning, A/B testing, and CI/CD workflows reducing deployment time by 60%

- Develop prompt engineering strategies and RAG architectures for context-aware AI responses, improving user satisfaction by 40%
- Implement data processing systems compliant with GDPR/CCPA using encryption (AES-256) and access controls (AWS IAM)
- Collaborate asynchronously with cross-functional teams (sales, marketing, product) using Slack, Notion, and Jira to deliver technical solutions aligned with business goals

Data Intelligence Analyst

BizProspex • Remote, India • February 2025 – August 2025

- Conducted competitive intelligence research using Python (BeautifulSoup, Selenium) to analyze 10,000+ B2B company profiles from LinkedIn Sales Navigator
- Built SQL-based data validation frameworks improving dataset accuracy from 78% to 94% through deduplication and enrichment processes
- Automated ETL workflows using Python and Apache Airflow, reducing manual data processing time by 70%
- Delivered actionable insights supporting ABM campaigns and go-to-market strategies, contributing to improved lead quality and ROI

Data Quality Analyst & Team Lead

FunnelByte • India • June 2021 – February 2025

- Led QA initiatives for data projects, implementing automated testing frameworks that reduced error rates by 42%
- Managed team of 8+ analysts establishing documentation standards, data modeling practices, and knowledge transfer processes
- Built Python-based validation scripts and dashboards for real-time data quality monitoring
- Conducted business analysis and statistical programming to support evidence-based decision making

TECHNICAL SKILLS

AI & Generative AI: Large Language Models (GPT-4, Claude, Llama), LangChain, Hugging Face, Prompt Engineering, RAG, Fine-tuning, Vector Databases (Pinecone, Weaviate, ChromaDB)

Programming & Data: Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, MySQL), Data Analysis, ETL/ELT Pipelines

Cloud & MLOps: AWS (SageMaker, Lambda, S3, EC2, IAM), Docker, Kubernetes, MLflow, CI/CD (GitHub Actions), Terraform

Big Data & Streaming: Apache Kafka, Apache Spark (PySpark), Apache Airflow

ML Frameworks: TensorFlow, PyTorch, Scikit-learn

Business Tools: Salesforce, HubSpot, LinkedIn Sales Navigator, Tableau, Excel

Collaboration: Slack, Notion, Jira, GitHub, Asynchronous Communication, Remote Team Management

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration (Honors)

Devi Ahilya Vishwavidyalaya, Indore • 2019 – 2022

Technical Foundation: Self-study in Data Structures & Algorithms (MIT OCW), Linear Algebra for ML (Coursera), Statistics, Database Systems, Python Programming

Professional Certifications:

- Full Stack Generative and Agentic AI with Python *Issued by NVIDIA* ([Click here to see](#))
- Building LLM Applications With Prompt Engineering *Issued by UDEMY* ([Click here to see](#))
